# IT'S NOT A PRODUCT. IT'S PROGRESS.

Wisconsin is about to get new and improved. But it's not because of anything you can find in a store. In fact, it's what you won't find—in stores or restaurants, or any of Wisconsin's workplaces—that's making all the difference. And that's secondhand smoke. On July 5, 2010, our state is kicking Big Tobacco out of Wisconsin's workplaces. Now everyone will have plenty of smoke-free, toxin-free, chemical-free places to gather and eat and work.

## FIGHT WITH FACT

Big Tobacco's profits are costing real people's lives. So FACT won't stop until they do. It's your fight, too. Find out about the next stage of FACT's fight at [sevenfive10.com](http://sevenfive10.com).
