

Attachment 6

Data Layout for Verbatim File

| Field Name                                   | Starting Column | Size | Format/Values/Explanation  |
|--|-----------------|------|--|
| Sequence Number (seqno)                      | 1               | 10   | A unique 10-digit number for a state for a year with year in the first four digits.                                    |
| Replicate Number (repno)                     | 11              | 5    | The first two digits, 01-12, represent months, the last three digits a sequential number starting with 001 each month. |
| Replicate Depth (repdepth)                   | 16              | 2    | A sequential number from 01-50 in each replicate.  |
| Starting Column Number in ASCII File (colno) | 18              | 3    |  |
| Blank  | 21              | 9    |  |
| Verbatim (verbatim)                          | 30              | 200  |  |
| End-of-File Marker (eof)                     | 230             | 1    |  |
