

Identifying and Eliminating Tobacco-Related Disparities in Indiana

Agreement Form

Because identifying and eliminating tobacco-related disparities through the implementation of Indiana's strategic plan requires a collaborative effort among all public health and community partners across the State,

We, _____, agree that addressing tobacco-related disparities should be a priority within our organization and that we will incorporate the following goals in our annual action plan (check all that apply):

____ Identify and strengthen funding for tobacco prevention and control in Indiana for the purpose of identifying and eliminating tobacco-related disparities.

____ Eliminate information gaps in data (quantitative and qualitative) that prevent the identification of tobacco-related disparities in Indiana.

____ Promote a comprehensive approach to tobacco prevention and control that is population and community specific.

____ Reduce the influence of the tobacco industry on disparately-affected populations in Indiana.

____ Reduce disparities of tobacco use among specific populations identified in data analysis.

As part of this agreement, we will work continuously with organizations and communities that are connected in this effort to identify and eliminate tobacco-related disparities in Indiana.

I, _____, am not able to make a commitment for my organization at this meeting. I plan to take this information back and determine what type of commitment our organization can make and respond to the ITDD Workgroup c/o Smokefree Indiana by July 30, 2004.
